Choose the correct answer: -

**1- What are the steps that involved at the project planning:**

- a. Initiating systems investigation.
- b. Determine who will participate.
- c. Perform feasibility analysis.
- d. All above

**2- Do we could change IS team between phases?**

- a. True
- b. False

**3- Feasibility analysis is undertaken to determine if the project should go ahead or not?**

- a. True
- b. False

**4- Type of Feasibility analysis:**

- a. Technical feasibility.
- b. Legal feasibility.
- c. Operational feasibility.
- d. All above.

**5- Technical feasibility is one of the feasibility analyses, what we do in this step?**

- a. Know which hardware, software, and other system components he requires solving the problem.
- b. Know if any laws or regulations prevent or limit a systems development project.
- c. Assess whether the time and resources available can be balanced.
- d. None of the above.

**6- Legal feasibility is one of the feasibility analyses, what we do in this step?**

- a. Know which hardware, software, and other system components he requires solving the problem.

- b. Know if any laws or regulations prevent or limit a systems development project.
- c. Assess whether the time and resources available can be balanced.
- d. None of the above.

**7- What is the result of poor management?**

- a. Poor performance of the system.
- b. Unreliable software.
- c. Delivered the project late.
- d. All above.

**8- There are lots of different types of people involved in development, how does “Developers” participate in project development process?**

- a. He delivers the technical skills that are necessary to make the application.
- b. He specifies the requirements for the software.
- c. He interacts with the software once it is released for production use.
- d. He plans, motivates, organizes, and control developers who do software work.

**9- What are the aspects that you must put in your mind when you choose your project team members?**

- a. Their Attitude.
- b. There are communication skills.
- c. There is educational background.
- d. All above.

**10- Make good project Scheduling help us in:**

- a. Avoid situations where the whole project is delayed because of a critical task being unfinished.
- b. Know if any laws or regulations prevent or limit a systems development project.
- c. Figure out what Expected costs and benefits of the proposed system.
- d. All above.

**11- Does Organize tasks so that they can be done concurrently (in parallel) help us to make best use of the workforce?**

a. True.

b. False.

**12- Does it is important to update project schedules?**

a. True.

b. False.

**13-Which type of feasibility analysis assesses whether a proposed project is economically viable and worth the investment?**

a. Technical Feasibility.

b. Economic Feasibility.

c. Operational Feasibility.

d. Legal Feasibility.

**14-Legal feasibility analysis involves in .....?**

a. Analysing the financial viability of the project.

b. Ensuring that the project complies with laws and regulations.

c. Assessing the system's technical requirements.

d. Evaluating the project's impact on daily operations.

**15-Which project management tool is commonly used to visualize and manage project schedules?**

a. Gantt chart.

b. Project charter.

c. Risk matrix.

d. Change request form.

**16-What is one potential consequence of poor project management in system analysis?**

- a. Efficient use of resources.
- b. On-time and within-budget project delivery.
- c. Scope creep and project delays.
- d. Clear and well-defined project objectives.

**17-In system analysis, if project managers fail to communicate effectively with stakeholders, what might occur?**

- a. Stakeholders may not be aware of the project's existence.
- b. Stakeholders will be highly satisfied with the project's progress.
- c. Stakeholders will have a deep understanding of technical details.
- d. Imbalance in project goals and stakeholder expectations.

**18-How can poor project management impact the success of a system analysis project?**

- a. It ensures the project stays within the defined scope.
- b. It increases the chances of meeting all project deadlines.
- c. It can lead to project failure or bad outcomes.
- d. It aware with the needed budget.

**19-What is the primary purpose of a Gantt chart in system analysis?**

- a. To display a project's resource allocation.
- b. To represent a project's budget.
- c. To visualize the project schedule and task dependencies.
- d. To manage project risks.

**20-What is the primary purpose of PERT in project management?**

- a. To calculate project costs.
- b. To create Gantt charts.
- c. To estimate project durations and identify critical paths.
- d. To allocate project resources.
